

# COMPANY PROFILE

We deliver top notch quality for all  
our products and services

# Founder Speech

Dear customers and Partner in Business,

We at SURIA ENGINEERING SOLUTIONS BHD. would like to express our sincere thanks, appreciations and gratitude towards all our customers, partners and friends who have already rendered their unconditional support to us for all these years.

The establishment of SURIA ENGINEERING SOLUTIONS was driven by our ambitions to produce and sell smart engineering products and solutions that are simple, effective and beneficial to mankind and mother earth. We want our product to be able to help with solving common problems in daily life with new engineering solutions that are smart and effective.

We are committed to ensuring long-term sustainability of our activities and believe that cooperating with us will be very attractive for our customers in terms of profits, benefits and reliabilities.

We look forward to working with you, have a great day!

Sincerely, Zulkufli B. Zakaria.

---

Zulkufli B. Zakaria, Founder/CEO

# HISTORY

Suria Giant Fan Services Sdn Bhd was established in 2014, our business mainly focused in supplying HVLS Giant Fan throughout Malaysia. We were proud to be the only company that 100% manufacture, assemble, supply and install our own Giant HVLS Fan.

Our HVLS fan manufactured using premium quality motor, components and controller imported from Europe comparable to the best HVLS fans in the world.

# ABOUT US

Suria Giant Fan Services Sdn Bhd was established in 2014, our business mainly focused in supplying HVLS Giant Fan throughout Malaysia. We were proud to be the only company that 100% manufacture, assemble, supply and install our own Giant HVLS Fan.

Our HVLS fan manufactured using premium quality motor, components and controller imported from Europe comparable to the best HVLS fans in the world.

**MORE THAN 7 YEARS IN INDUSTRY**  
**1467 HAPPY CUSTOMERS**  
**33 TEAM MEMBERS**

# What We Do?

## MANUFACTURER

We produce our own giant fan with advanced technology from Europe and Italy. But all parts of Giant Fan are from Malaysia. We successfully produced a high quality five/six blade HVLS fan and save electricity

## CONSULTATION

Suria Engineering Solutions provide free consultation and site visit throughout Malaysia for free.

## SUPPLY

We also supply and manufacturer of HVLS fan to the market in Malaysia and may expand its branches overseas.

## INSTALLATION

Our company has provided trained workers in the field of installations and electrical for installations activities.

## SERVICE & MAINTENANCE

We provided services after sale for Suria and other HVLS fan brands to maintain.h

# Our Team & Strength

## MANAGEMENT

Our management team encourage and lead new initiatives to achieve common goals. Their leadership skills in the organization strengthen operational effectiveness.

Administrating and empowering the organization, the management prioritize sustainable business growth and expansion in order to deliver long-term value to shareholders.

## MARKETING & SALES

Our sales and marketing team focuses on the execution of marketing plans, building networks to expand our market by introducing new partnerships and business opportunities.

Our marketing team analyzes geographic target markets by strategically focus on potential buyers, understanding their needs and keeping abreast of future emerging trends.

## ADMIN & ACCOUNT

Admin and account team grants the highest quality service to the Centre through leadership of the professional practices and management of its infrastructure and all assets including administrative and financial resources.

Providing administrative support for the Centre in its daily operations, overseeing budgeting and accounting, and developing and producing organizational analyses to assist in long-term strategic planning.

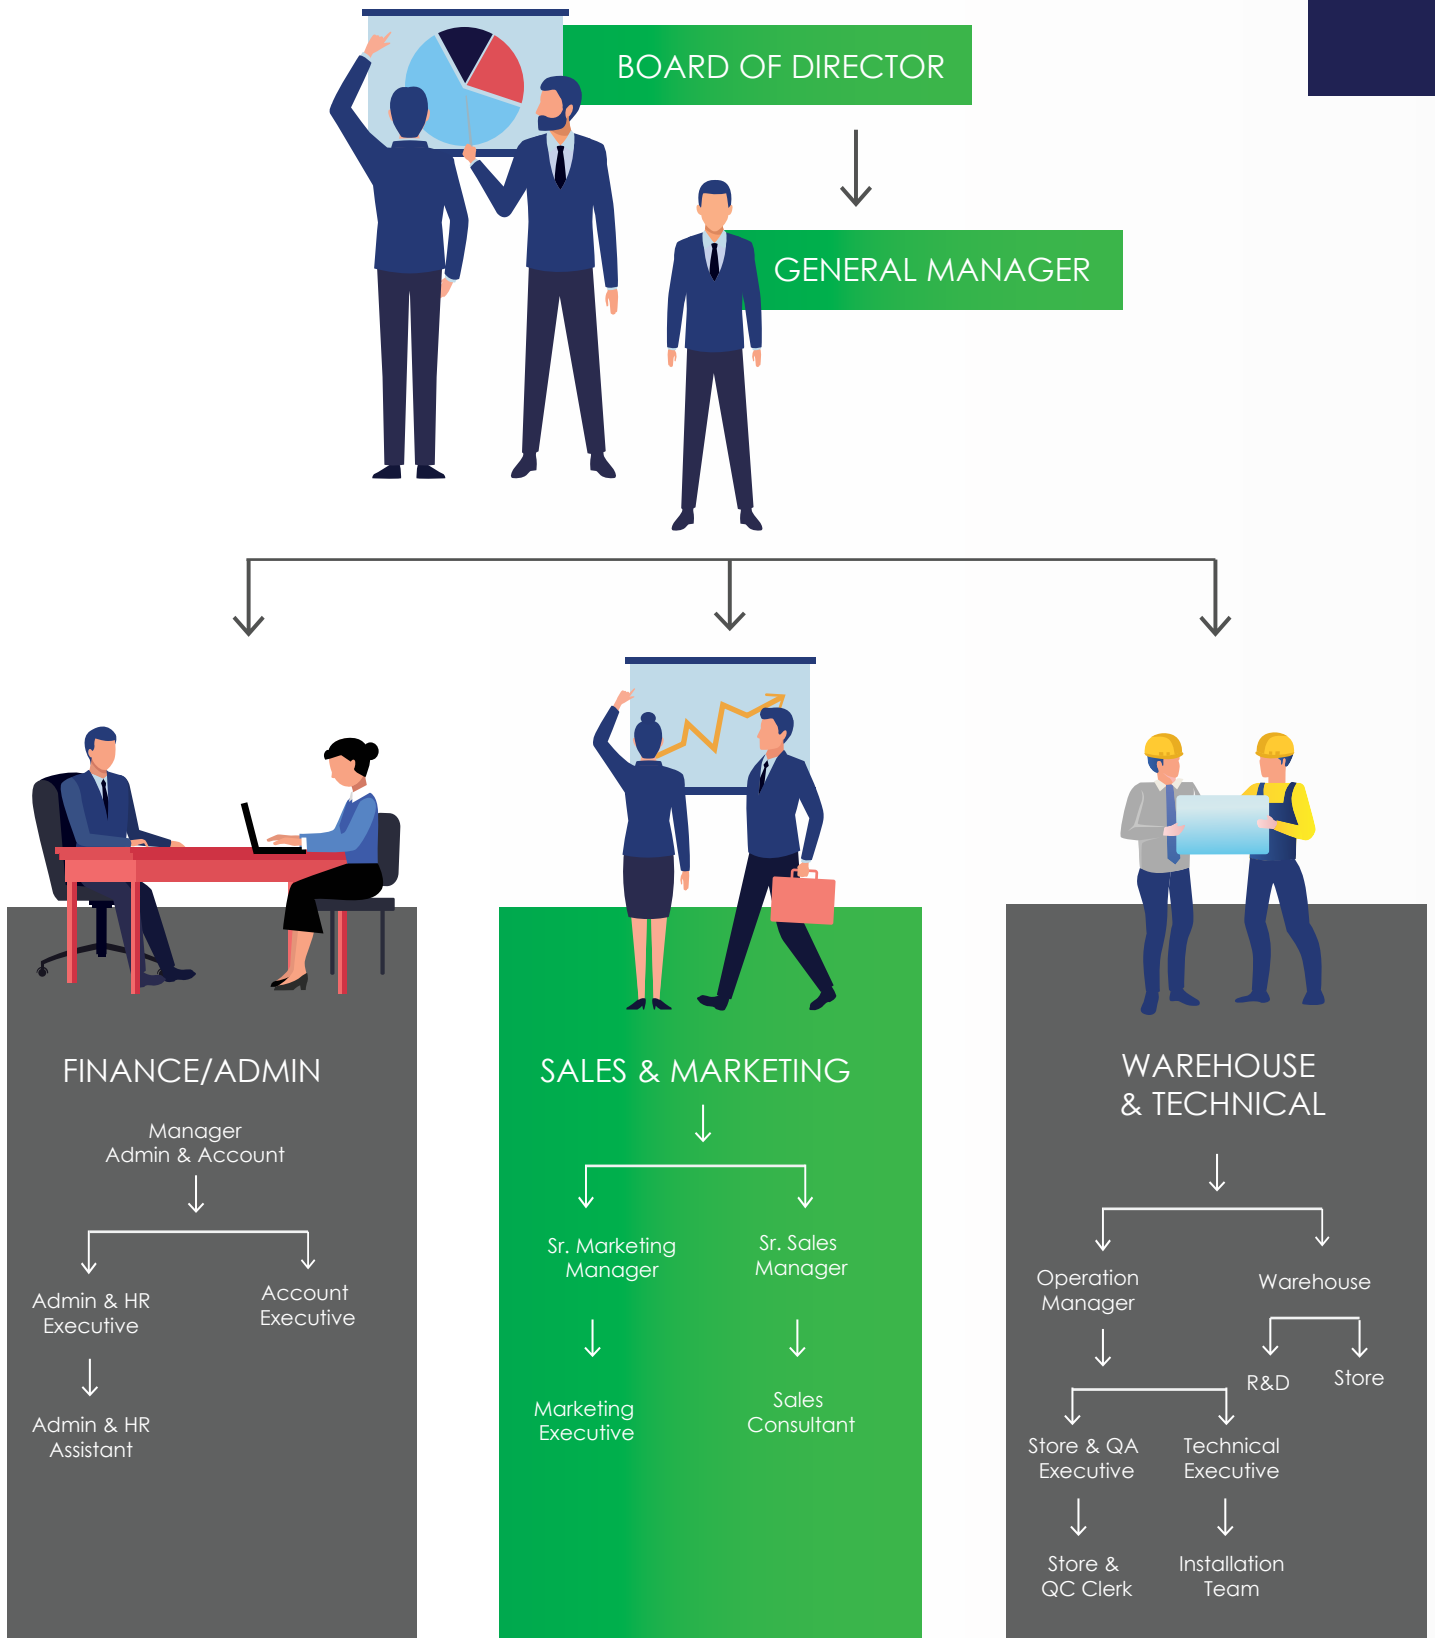

## TECHNICAL SKILLS

We believe in constant improvement at every level to support company's overall operations. We provide training to enhance our employee knowledge and further develop their skills.

This will respect their personal strength and show professional value in the organization. We believe in consolidating our knowledge and working together for the best solutions.

# Organization Chart

# HVLS & Industrial Product

## X-SERIES

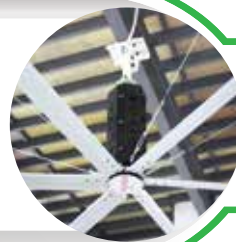

### LOW NOISE YET POWERFUL

X Series uses special permanent magnet motor to produce noiseless around during its normal running. A natural breeze sound like can be heard from one metre away without any motor sound audible.

### BIGGER, BETTER!

HVLS Fans (High Volume Low Speed Fans) is the new solution of energy saving to solve the ventilating or cooling problem of large space. Our large energy-saving ceiling fans comes with maximum diameter of 7.3 meters.

## EURO SERIES

## Grande Series

### INVERTER INSIDE

Grande series use built-in inverter to reduce high frequency electronic noise that may cause interference with other devices.

### GIANT OUTDOOR FAN

Pole Type HVLS Fan can be installed at places where there are no ceilings that HVLS fans can be installed from. Since these fans are to be installed in an outdoor setting, the fans have a relatively big diameter as well.

## POLE SERIES

## EXHAUST SERIES

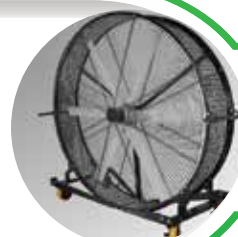

### FRESH AIR IN, HOT AIR OUT

Exhaust fans work by sucking hot or humid air out of a small localised area, allowing fresh air to enter from elsewhere (perhaps a doorway or vent) in order to replace it.

### REMOVABLE COOL AIR

Bring cool airflow with you with our Mobile Large Industrial Fan. These fans are best suited for large workplaces, such as in a factory or workshop setting. Just roll these industry fans around to anywhere you need it!

## MOBILE SERIES

A tall, green metal structure with multiple levels of orange car carriers. Several white cars are parked on the upper levels, and a black car is on the ground level. The structure is located outdoors next to a building with large windows.

## Rotary Parking

### **SMALL SPACE, MORE PARKING**

This parking equipment is design to provide parking capacity base on pallet's movement circulation. Designed for small quantity of parking spaces Therefore it provides short time of vehicles entry.

## Smart Parking

A silver car is parked on a blue and white mechanical lift system. The car is on a platform that can move vertically. The system is located indoors, possibly in a garage or parking structure.

## Stacker Lift Parking

### **STACKED UP!**

Stackers are aimed to double the parking space above ground / basement type parking. Full art in technology. They have horizontal carts in each level and a vertical lift which carries the car from the device level to different floors.
