"Reduce Energy Costs with High Volume Low Speed

Pole series HVLS fan fits both usage for outdoors and indoors. The Pole Series system used in the fan is very environmental friendly which is ideal for ventilation, cooling and naturalising the humidity in the large or small space. The Pole Series HVLS fan has been proven to dehumidity the surrounding air quality by flowing the fresh air through its efficient air ventilation system. Its will create a healthy and comfortable working environment especially in enclosed spaces where air ventilation system is limited. The Pole Series HVLS Fan can be installed at places where there are no ceilings that the HVLS fans can be installed from. Since these fans are to be installed in an outdoor setting, the fans have a relatively big diameter as well. Our biggest Pole Series HVLS Fan can distribute an airflow volume of up to 540,000 CFM with a 7.3m diameter. The Pole Series HVLS fan are tested and simulated for the best results.

WHY choose us?

- Lower cost for investment
- Offer silent operation
- Cut energy consumption for heating
- Maximum air volume and air coverage
- Industrial ventilation and perfecct solution
 - ★ Help reduce condensation on floors
- Multi-fan control and adjustable fan speed

ADVANTAGES Of POLE SERIES

READY SPARE PART

We have replacement parts accessible when the original part malfunctions or wears out. We also have proper maintenance service as important aspect of this industry. Prossessing great quality spare parts can offer several benefits across several levels of operation.

ZERO SOUND

We have a very low cost for our giant fan. The price has always been, and will be always be, a significant indicator or quality, so making a high quality product affordable and valuable is almots negligible difference.

SWEATING SLAB SYNDROME

Controlling the air in the room is not very difficult though. The thing is that most of the viruses such as influenza flourish in dry environment perfectly. So regulation of humidification will help you protect you and your kids from unwanted illnesses and reduce humidity, moisture and bacteria.

HIGH QUALITY, **LOW COST**

Our giant fan is ultra quiet during stable running. Sound signature of less than 45dB. Giant fan operate silently and efficiently requiring no maintenance for years to come.

SURIA GIANT POLE HVLS FAN

PRODUCT SPECIFICATION

Model	HDS-L3		HDS-L5		HDS-L7(1.1kw)		
Diameter	10ft/3m	12ft/3.7m	14ft/4.3m	16ft/5m	20ft/6.1m	22ft/6.7m	24ft/7.3m
